

Naval Construction Battalion Center Port Hueneme

"The Seabee Link to Readiness"

JUNE 02 SITREP

N1 Resource Management

Paul Defreitas, Acting Director

<mailto:DefreitasPB@cbchue.navy.mil>

- FY04/05 OPN Budget - Developed input for FY04/05 Navy Budget Submit for OPN. OPN budget displays were compiled and entered into the DON OPN Budget System documenting and justifying planned CESE procurements in support of the NCF, other Expeditionary Units and Navy Shore Activities.
- SBA-VSIP/VERA - Executed authorized Special Buyout Authority and VSIP/VERA actions for nine employees to reshape and streamline the workforce.
- LOG QMB - Meeting was held 7-8 May and involved prospective 1NCD N41(CDR Phillips) and N43 (CDR Adams). A meeting was also held in conjunction with the QMB on 6 May that focused on NAVSUP support to the NCF. A decision was made to continue the LOG QMB after 1 NCD is established as a forum for leadership discussions and decisions on NCF Logistics issues.
- NCBC PH Purchase Card Program Review - Completed the DON mandated semi-annual review of the NCBC PH Purchase Card Program with positive results and participated in the first annual DON (EBusiness Office) Government Purchase Card Conference of Agency Program Coordinators in Norfolk, Va.
- Civilian Payroll Transfer - Participated in a DFAS Norfolk Conference to discuss transfer of the civilian payroll function from Denver to Charleston.
- FY03 RAP - Based on draft EDMs distributed from NAVFAC, Review, Input and Adjustment (RI&A) requests were developed to address shortfalls. A briefing was prepared and delivered to the NAVFAC/Field Activity RI&A Meeting on 14 May 02 by CAPT Cowell, successfully relating NCBC PH's mission objectives and documented shortfalls. No additional resources were made available at this time.
- FY02 RAP Chg#1 2% Reduction. Reclama was prepared to address a 2% reduction to NCBC PH O&MN budget and forwarded to NAVFAC for consideration in restoring funding. Reductions were allocated across all O&MN accounts to mitigate impact to NCBC PH mission operations and program plans adjusted to new controls.

CED A-76 - Completed 95% review of the Performance Work Statement for the A-76 review of CED Port Hueneme.

- FY02 OPN Mid-Year Review - Provided obligation data and other supporting information on execution of assigned FY02 OPN funds for CESE procurements.

N3/5 Operations & Plan Department

LCDR Brant Pickrell, Director

<mailto:PickrellBD@cbchue.navy.mil>

- The MUSE Team conducted one inspection and one assist visit. MUSE completed the NRCC Singapore inspection where the equipment was found in good condition. They also deployed one technician in support of NFESC to assist in preserving and packaging two mobile substations and four 200 kW generator sets at a deactivated facility in Winter Harbor, Maine. Unit will go to Mechanicsburg, PA for deep storage. Potential MUSE deployments include NSWC Dahlgren's request for (2) 1500 kW power plants for MILCON support, one substation to support a clean up operation at a nuclear facility at DOE in Colorado, and Newport News is tentatively requesting four additional 2500 kVA substations in support of carrier operations.
- 3M implementation developments include completion of the MRCs for the M17 Decontamination Unit (ready for submission to FTSCPAC) Upcoming visits include the following:
 - Week of 03 Jun: MRC validation of remaining CESE and CEEI items at UCT-2.
 - Week of 17 Jun: "form, fit, function" inspection and validation of CESE and CEEI at ACB-1.
 - Week of 22 Jul: MRC validation of assets at 20th NCR.
 - Week of 29 Jul: MRC validation of assets at 31st NCR.
- Final Two Plus Two CESE Only contract developments include the following:
 - Reviewing available CESE assets due to the elimination of three RNMCBs and determining new requirements based on assets available.

JUNE 02 SITREP

Pg. 2

- Reviewing contract mechanism to meet requirements. Requirements redefined and a market survey will be conducted in mid-June to determine interest.
- Contract award now expected at the end 1st Qtr/early 2nd Qtr FY03.
- Received funding for 35 percent design and design/build RFP preparation for MTRV Simulator Facility in Port Hueneme (FY03 construction). Currently working on similar preparation for Gulfport facility (FY03 construction). Fort Leonard Wood design expected to be complete in June and construction complete in Nov 02. Met with simulator contractor and due to delay in the production of MTRV cabs, the completion of the Fort Leonard Wood facility is delayed to mid-March 2003. Updated completion dates for all facilities can be found at https://ncf.navfac.navy.mil/ncbc/N3/ppt/MTRVWeb_6_3_02.ppt.
- A design review meeting was held in Gulfport to discuss the new MCOOC facility. NCBC PH members attended to comment on the Integrated Logistics Overhaul (ILO) aspects of the facility. While the facility appears to provide automation to expedite packing procedures, it did not clearly address the unpacking process involved with an ILO. Time limitations and incomplete ILO process development were reasons for the focus on packing vice ILO. The ILO process POA&M can be found at https://ncf.navfac.navy.mil/ncbc/N3/ppt/ILO_Upd_6_03_02.ppt.
- Currently evaluating NCTC, PH CESE for Condition Code updates in CASEMIS (10% complete).
- Reviewing Allowance Change Request (1220/ACR) status against TA-14 and training needs (Long Term).
- CED processed 41 shipments to Bahrain, 17 for Specwar and 4 for San Clemente while continuing with the Statement of Work and other CA study action items.

N4 Logistics Department

Dean Sommerhauser, Director

<mailto:SommerhauserDP@cbchue.navfac.navy.mil>

High Visibility Buys

- CORE 1 Packup – Completed Core 1 packup for NX8141 in support of Operation

EnduringFreedom (Bahrain). Twelve items still remain short of which four will not be procured (items are obsolete and have no impact on mission capability), two items are in back order status, we expect delivery of two items mid-June, and two items were lost in processing and require to be re-procured in addition to two additional items requiring procuring.

- Homeport 1 ARP Packup – Initiated estimated \$1.5M Homeport 1 ARP packup in support of Operation Enduring Freedom.
- Prime Vendor/Credit Card Buys
 - Received, processed, awarded and delivered 84 PRI02 documents for CORE 1 Packup (R3)/May 9th delivery
 - Received and processed 199 PRI02 documents for ARP Packup (L3)/May 22nd delivery. As of May 21st, 188 of the documents have been awarded and were scheduled for on-time delivery. Awaiting quote for the remaining 11 documents.

- Received an additional 475 PRI02 documents for ARP Packup (L3)/June 14th delivery; 375 documents forwarded to Prime Vendor for quote, 100 out for credit card quotes.

Contractor Support Services

- FMS Taiwan Project – Finalized all arrangements for the pickup of the SLWT for the Taiwan Navy. On 8 May 2002, with the assist of the Logistics contractor and the 32nd St. NAVSTA, San Diego Crane Department, the SLWT was delivered and placed onto a Taiwan container freighter contracted for this purpose by the Taiwan Navy. Projected arrival in Taiwan: 24 May 02. Training to Taiwan Navy personnel is planned to begin immediately after the depreservation process is completed.

- ABLTS Logistics Project – Conducted the final ABLTS Technical Manual (TM) In-Process Review 22-25 Apr 02. Final logistics, training, and TM documentation required by the Logistics contract are expected to be completed by Jul 02.

Miscellaneous

- Repair Parts/Component Shipments – Established control desk and prescreen and processing procedures to promote accurate customer pricing and obligation status.

JUNE 02 SITREP

Pg. 3

SEALIFT

- Held a Sealift Quarterly Program Review with the Deputy Program Manager and his staff. Presented progress of FY02 FACTASKs, current funding posture, and drafted a FY03 FACTASK.
- Issued tasking via existing Omnibus contract to convert hard copy of ELCAS(M) design manuals to CD-ROM electronic format.
- ABLTS: 1st ABLTS system successfully delivered to BICmd in time for loadout onto the MPF Ship Bonneyman.
- Completed development of the ABLTS Spares packages.

CESE

- Deliveries have begun for the Military Tactical Vehicle Replacement (MTVR). MTVRs were delivered to training units at NCBC PH and NCBC GP.
- Developed the FY04 CESE buy plan.

CBR-D

- Received and issued suits for training to NCTCGP, PH and 31stNCR.
- Conducted special project for 3rd NCB TOA inventory comparison.
- Received 80 revised CD ROM Tech manuals for M17's.
- Completed IMDB updates.
- Reviewed and corrected NAVSEA spreadsheet for NAVFAC manning for the distribution of JLIST suits. (NCF & NOSA).
- Received partial shipments of special tools for M17 units.

Weapons

- Identified new weapons for the SEABEES to look at for future upgrade at the NDIA conference in Atlantic City.
- Bringing online the new M240B and developing a call out plan to Implement to the SEABEE units.
- Researching adding a Range finder and Infrared unit to the SEABEE TOA.
- Attended National Defense Institute Association expo in Atlantic City, NJ (3 days)
- Attended Annual NCF Weapons/NVD review in Gulfport.
- Attended the MPF Program Review at BIC.

Communications

- Forwarded MBITR ACR for NBG ONE/TWO w/endorsements to NAVFAC on 3 May 02
- Submitted Work Transmittal Sheets for the following TOAs:
 - CBMU - Qty decrease of VHF Antennas

- UCT - Qty increase of secure phones and HF Antennas
- NMCB - Deletion of VHF Assy from SLRP Group/Facility
- EOD - Addition of MBITR Assemblies

- Submitted Work Transmittal Sheet to delete outdated Facility in the CBMU TOA.
- Validated/updated Cage/Part Nr for 34 Deferred NSNs on Screens 2 & 3 of the IMDB Submitted Buy Plan to for 80 XTS-5000 Radios for NBG-1 @ \$325,019
- Submitted spreadsheet to Acquisition Div. week of 6 May for 20 AN/PRC-148 MBITRs @ \$176,712.
- Meet with Naval Coastal Warfare Rep to discuss future CBC procurements of communication gear. Follow up meeting in San Diego may be required in order to observe mission of Naval Coastal Warfare and how they employ/install radios.
- Seabee Engineering Reconnaissance Team (SERT)

- Attended meeting on 23 May to discuss development of TOA. There will be follow-on meetings to define requirements based on concept of operations, mission statement and TAC memo (which is currently being developed).

N6 Communications/Information Technology Department

Joe Sweeney, Director

<mailto:SweeneyJR@cbchue.navfac.navy.mil>

- MicroSNAP MOSS User documentation (Handbook, Backup/Restore/Status Changing, Products & Contacts) added to the NCBC PH Intranet for improved support to field application users.

N7 Training Department

Roy Herd, Director

<mailto:HerdR@cbchue.navfac.navy.mil>

- Completed and delivered the Marine Corps Housing Automated System (MCHAS) training course.
- Completed draft ABFC 1000.1 training course revision and forwarded for the in-process review.
- Received approved Training Project Plan from CNET for the MTVR maintenance training course.
